Projects

- Shopper E-commerce Application. (Live Demo) (GitHub Repo)

- **Core Architecture:** Built a scalable web application using Next.js 15 App Router, TypeScript, and React 19.
- **CMS Integration:** Leveraged Sanity.io to manage real-time product data, categories, and blog content.
- **Payments & Auth:** Implemented secure checkout flows with Stripe and user authentication/management via Clerk.
- **UI/UX:** Designed a pixel-perfect, accessible interface using Tailwind CSS v4, Radix UI, and Framer Motion for enhanced user engagement.
- **State Management**: Utilized Zustand for efficient handling of shopping cart and wishlist states across the application.

- Instrument Studio – Creative Agency Portfolio : Designed and engineered a dynamic portfolio platform for "Instrument Studio," a creative agency specializing in branding and digital experiences. (Live Demo) (GitHub Repo)

- **Architecture:** Leveraged Next.js 16 (App Router) and React 19 for a robust, server-rendered foundation.
- **UI/UX:** Implemented a custom design system using Tailwind CSS 4, featuring a dark-themed, high-contrast aesthetic with custom typography.
- **Interactions:** Integrated Framer Motion for scroll-triggered entrance animations and hover effects, alongside Lenis for momentum-based smooth scrolling, creating a fluid narrative experience.
- **Content:** Showcased diverse projects (Web3, Mobile Apps, Merchandise) through responsive grid layouts and optimized media assets.

- The Wild Oasis – Dashboard Hotel Management Application (GitHub Repo):

- Developed a feature-rich SPA for hotel administration using React and Vite.
- Integrated MongoDB as the primary database to store and manage complex relational data including cabins, bookings, and application settings, ensuring high availability and data consistency.
- Utilized React Query for efficient server state management, caching, and optimistic UI updates to minimize latency.
- Designed a responsive and accessible UI with Styled Components, featuring a dynamic dark/light mode and interactive dashboard charts.

-My-Blogs – Personal Content Management System Built a robust, responsive blogging platform tailored for daily content creation and weekly review. (GitHub Repo):

- **Core Stack:** Utilized Next.js 15 for high-performance server-side rendering and routing.
- **Content Creation:** Integrated React Quill to provide a full-featured rich text editing experience for writing blog posts.
- **Data Layer:** Implemented Prisma ORM with for type-safe database interactions and efficient schema management.
- **Security:** Secured the application with NextAuth.js v5, ensuring protected routes and safe user sessions.
- **Styling**: Crafted a responsive design using CSS Modules, ensuring a consistent experience across devices.
