Abdul Qadeer Buriro

+92 3153440945 | abdulqadeerburiro110@gmail.com | **LinkedIn** | **GitHub**

EDUCATION

Mehran University of Engineering and Technology **Jamshoro, Sindh, Pakistan**

Bachelor of Engineering in Computer Systems Engineering | **CGPA: 3.04** Nov 2021-Nov 2025

TECHNICAL SKILLS

- **Programming Languages:** Python (with DSA), Java, JavaScript, C++, PHP
- **Web Development:** Full-stack web development using React, HTML, CSS, JavaScript, Bootstrap, Tailwind, Vite on the frontend, and Node.js with Express on the backend.
- **Databases:** MongoDB, MongoDB Atlas, MySQL, PostgreSQL, Firebase
- **Full Stack:** MERN Stack (MongoDB, Express.js, React.js, Node.js)
- **App Development:** React Native (iOS & Android) with MongoDB and Firebase
- **Python Libraries:** NumPy, Pandas, Matplotlib, TensorFlow, OpenCV, SciPy, Scikit-learn, Pytorch.
- **Tools & Platforms:** Microsoft Visual Studio/VS code, Git & GitHub, Postman (API Testing), MongoDB Compass/Atlas, Android Studio, PyCharm, Anaconda, Jupiter Notebook

WORK EXPERIANCE

Web Development Intern | Prodigy InfoTech | Virtual | **[2/2024] – [3/2024]**

- Built responsive React-based websites, designed key pages, used GitHub for deployment, and improved skills in Hooks, props, and event handling

Web Development Intern | Brainwave Matrix Solutions | Virtual | **[6/2025] – [7/2024]**

- Built a MERN Expense Tracker with income/expense tracking, insights, filters, and authentication.
- Built a MERN e-commerce website with product management, authentication, cart, and secure orders.

Full Stack Development Intern | CERTURA | Virtual | **[1/07/2025] – [1/08/2025]**

- Built React websites with key pages, GitHub deployment, & improved Hooks, props, and event handling skills.

PROJECTS

MERN Stack:

- **LegalSahulat Web App**: FYP Project, built LegalSahulat, an AI-driven MERN platform for legal chatbot assistance, lawyer consultations, document analysis, and automated legal drafting.
- **Social Organization**: Developed a MERN-based Social Organization Platform connecting NGOs, volunteers, and admins with role-based authentication, project management, and secure dashboards.
- **Social Dashboard**: Built a responsive Social Dashboard with authentication, post CRUD, real-time interactions, and profile management.
- **Full Stack Authentication**: Built a full-stack authentication app with React, Node.js, Express, and MongoDB with JWT-secured login, signup, password reset, and dashboard.
- **School Management System:** Full-stack MERN app to manage students, teachers, and classes.
- **Chat App:** Real-time messaging app using MERN stack and Firebase.
- **E-commerce Store:** Online shopping platform with user authentication and payment integration (MERN).
- **Musician-Query:** Music search and player app built with React.js.
- **Portfolio Website:** Personal portfolio using MERN stack showcasing projects and skills.

React Native:

- **Job Finder App:** React Native app for job searching and application tracking.

Python:

- **Python Data Visualization:** Data analysis and visualization projects using NumPy, Pandas, and Matplotlib.
- **Banking System:** Python-based system for handling deposits, withdrawals, and accounts.
