Haris Babar

harisbabar012@gmail.com • +92-316-6861729 • GitHub • Website • LinkedIn • Punjab, Pakistan

Detail-oriented and highly motivated Software Engineering student with hands-on experience in **Software Development** and **Agentic AI Systems**. Passionate about Cloud and DevOps engineering, with a strong interest in infrastructure automation, containerization, and production-grade system reliability.

Skills

- **Agentic AI & Tools**: Google ADK, A2A, MCP (Agentic Multi-Agent Control Platform)
- **DevOps & Cloud**: Azure, Docker, GitHub Actions, CI/CD Pipelines
- **Programming**: Python
- **Development**: HTML, CSS, Node Js, React Js
- **Networking:** IP, HTTP/HTTPS, LAN, WAN, CLI
- **Monitoring & Version Control**: GitHub, Git, VSCode

Experience

JAN 2026 – FEB 2026
Junior AI Developer & DevOps | KloudStack | Reading, UK

- Working on the development and optimization of AI-driven solutions, focusing on Agentic AI systems for enterprise automation.
- Collaborating with cross-functional teams to integrate AI models into production environments following DevOps best practices.
- Supporting containerization deployments using Docker and contributing to infrastructure observability and performance optimization.

OCT 2025 – DEC 2025
Agentic AI & Azure DevOps Intern | KloudStack | Reading, UK

- Assisting in the design and deployment of Agentic AI systems for enterprise automation using Google ADK and A2A MCP.
- Collaborating and Azure DevOps pipeline creation for automated build, test and deployment processes.
- Supporting infrastructure management on Azure Cloud with a focus on scalability and observability.

SEP 2024 – DEC 2024
Software Developer | QAQF | Birmingham, UK

- Designed and developed a real-time chat application, implementing Socket.IO for seamless communication between users.
- Built and maintained both frontend and backend components to ensure efficient message delivery.
- Enhanced user experience by optimizing real-time messaging workflows and ensuring reliability across the application.

NOV 2023 – SEP 2024

Software Developer | Queper | Multan, Pakistan

- Developed web-based solutions to streamline business processes and improve system functionality.
- Led the development of a Tree Donation Project, enabling users to contribute to environmental conservation through an intuitive web platform.
- Created an interactive dashboard displaying real-time data analytics for tracking donated trees and environmental impact.

Projects

- **Multiagent Business Agentic Application**: Developed a multi-agent business automation system leveraging Google ADK and MCP for autonomous agents for decision-making and workflow optimization.
- **AI Text-Based Emotion Recognition Application:** Building a machine learning model using python, NLP, and Scikit-learn to classify emotions from user input text with improved accuracy.
- **RedVapt – AI Penetration Testing Platform:** Developed an AI- powered penetration testing platform designed to automate the vulnerability scanning, treat detection and security.
- **Femme Physique Care:** A physiotherapy- focused website designed to support Doctor of Physical Therapy (DPT) services.
- **Afzal Hospital Project:** Developed and deployed a web-based hospital website to provide information, services, and an accessible online presence for the hospital.
- **Chat Application:** Designed and implemented a real-time chat app with Socket.IO integration in frontend and backend for seamless instant messaging.
- **CRM System**: Implement chat application into the customer relationship management system to automate client tracking, communication, and reporting.
- **Auto Electronics Project**: Delivered a fully deployed and optimized retail website, improving product visibility and customer engagement.
- **Terra-Nova Project:** Built a donation-based platform to promote reforestation with live tree donation tracking and analytics dashboards**.**
- **Portfolio Project:** Developed a personal portfolio website to showcase academic, professional, and project achievements.

Education

APR 2023 – PRESENT

Bachelor's Degree in Software Engineering | Virtual University of Pakistan | Islamabad, Pakistan

BSSE | 8th semester

FEB 2019 – OCT 2022

Associate Degree of Science | Bahauddin Zakariya University | Multan, Pakistan

BSC

Certifications

JAN 2024

CCNA | Networking | CISCO Networking Academy

- Gained foundational knowledge of computer networks, protocols, and IP addressing.
- Learned core concepts of routing, switching, and basic network configuration.
- Built practical skills in network troubleshooting and connectivity management.
